PROFILE

IT graduate from Dedan Kimathi University of Technology who builds web applications with JavaScript, Node.js, Express and PostgreSQL, and designs brand and marketing graphics in Photoshop and Illustrator. I built and launched the website for a gas dealer in Limuru and am now building its stock, sales and cash management system, designing the database around how the shop really runs. I'm looking for a junior developer role where I can ship useful software and keep learning from an experienced team.

EXPERIENCE

Wamaina Gas Suppliers — 2024 – Present

Authorized gas dealer · Kwambira, Limuru

- Built and launched the business website on Netlify, with one-tap call and WhatsApp ordering for customers on phones.
- Designing and building a web management system to replace the shop's manual records, using Node.js, Express and PostgreSQL.
- Gathered requirements from the shop's daily operations: refills, brand swaps, customer credit, deliveries and daily cash.
- Designed the shop's branding and marketing: logo, business card, company profile, flyers, price promotions and social media posts.

IT Attachment — Sep – Dec 2024

IT Department · Limuru Technical and Vocational College

- Completed an industrial attachment in the college's IT department.
- Took part in the college's move of its daily activities onto the Ultimate Academic ERP system, and earned a certificate from Optimum Computer Systems Ltd for the ERP training.

PROJECTS

Wamaina Gas Management System — In progress

- Tracks cylinder stock by size (3, 6, 13 and 50 kg) and brand, with full and empty counts.
- Records refill sales with brand swaps both ways, customer credit and cylinders owed, and prepaid orders.
- Reconciles daily cash with Cash, M-Pesa and Till kept separate, with roles for admin, store staff and delivery.

Stack: Node.js, Express.js, PostgreSQL

Wamaina Gas Suppliers Website — Live

- Responsive business site with a photo hero slider, product and service pages, and direct call and WhatsApp ordering.

Stack: HTML, CSS, JavaScript, Netlify

Developer Portfolio · joe-acts.netlify.app — Live

- Multi-page portfolio with light and dark themes, an interactive stock demo and a contact form.

Stack: HTML, CSS, JavaScript
